

Advanced Safety for Public Employers (ASPE)

You will learn:

- PERRP standards in work zones, motor vehicles, permit-required confined spaces, lockout/tag, welding, trenching, PPE, machine guarding, fall protection, tree care hazards, respiratory and hearing conservation.
- Hazard recognition skills and possible control methods to safety and health issues in public sector worksites;
- Common public sector workplace hazards that have resulted in fatalities and catastrophes;
- Where to find PERPP standards and information about compliance alternatives.

Who should attend

Individuals who work for a public employer (state or local government agency) and are responsible for or assist with health and safety activities at their facility, as well as workers who are directly affected by those health and safety activities.
