LHS “The Business of Health Care”

People often think of health care when their employees are in need. Lake Hospital System (LHS) provides those services to many of the businesses in the area. LHS is working toward creating services to help employers with the employees, while addressing similar issues with its own employees.

What employers probably do not think about is the fact LHS is faced with the same business issues and decisions all businesses face. This presentation will show how LHS plans and adapts for continued growth in the continuously changing business environment. These plans include the opening of the new facility in Concord Township...TriPoint Medical Center.

With its groundbreaking for the state-of-the-art digital hospital, LHS is laying the foundation for more than a structure. LHS is building a philosophy of care that emphasizes patient safety, focuses on patient and family comfort and creates a healing environment.

Cynthia Moore-Hardy, LHS President and CEO, will provide a presentation describing how LHS conducts the “Business of Health Care” and as a result improves the overall state of health and safety in the surrounding area.
